

# TRACK AND FIELD

## GENERAL SPECIFICATIONS

- Every pit cover is constructed from the highest quality 18 oz. PVC vinyl.
- All high jump pits are fitted with the highest quality breather mesh sides which allows unrestricted and uniform air flow, while also preventing “ballooning”.
- Apple high jump pits are designed to provide the greatest resilience, correlated to safety and optimum performance. Pre-crushed virgin polyurethane foam is used for extended life. A lattice structure is employed to ensure maximum safety to the athlete upon landing.
- Convenient carrying handles are standard on all high jump pits. Double-stitched vinyl handles, internally reinforced are attached to the front and back side of each pit module.
- Top covers are 2” thick. Each is manufactured with a zippered pocket, designed to allow for replacement of foam on location, eliminating the necessity of shipping back to factory for reconditioning.
- Double-stitched seams are used throughout Apple products. This double-stitching is protected from wear and abrasion by being located on the inside.
- To prevent fraying of the open edges of the breather surface, all edges are sewn double-turned.
- Specially engineered high tensile strength thread is used exclusively on all Apple products.
- Industrial quality all-weather nylon zippers have been selected as the standard for all Apple pits.
- Velcro/vinyl covered automotive seatbelt straps are used in conjunction with tuck loops. This method provides a quicker pit to pit connection.
- D-rings are located on the sides of all Apple jump pits to ensure a hazard-free top surface.
- The D-rings are also available attached to the corners and the centers of the module base of complete systems for use in exterior applications, or for attaching weather covers.
- Easy moving and storage are features of the Apple modules and systems. Light in weight and convenient to handle, every Apple product will give the greatest value and service.
- Standard available colour sequences are: blue vinyl with red breather.
- All Apple high jump pits carry a full warranty against defective materials and workmanship, for a period of 2 years from date of shipment.
